

INTRODUCTION

National Central University was originally founded in Nanjing, China in 1915. In 1962, the Graduate Institute of Geophysics was founded in Miaoli, Taiwan as the re-establishment of the university. The campus was relocated to Zhongli in 1968. As one of the leading university in Taiwan, NCU has eight colleges: Liberal Arts, Science, Engineering, Management, Electrical Engineering and Computer Science, Earth Sciences, Hakka Studies, and Health Science, and Technology, along with several research centers covering cutting-edge disciplines. NCU is also one of the member of the University System of Taiwan (UST), sharing resources with Tsing Hua University, Chiao Tung University, and Yang Ming University.
